

ABSTRACT:

The invention relates to a control panel for video apparatus. For realizing greater flexibility with such control panels there is proposed that the control panel comprises at least an operating module (31) and a control module (32), the control module (32) having a first interface (37) for connection to a control panel (2) and at least a second interface (35) for connection to the operating module (31), and the operating module (31) having at least an interface (34) for connection to the control module (32).
